High complexity services

- Cardiovascular surgery:

More than 5,000 open-heart surgeries performed, high complexity procedures in pediatrics and adults, state of the art devices make our Institution known in Colombia as a leader in Cardiovascular Surgery, thoracic arrhythmias, Vascular, off-pump for coronary artery bypass and minimally invasive valve replacement.

A photograph of a surgeon in a blue surgical cap and mask, focused on a procedure in an operating room. The surgeon is wearing green gloves and is using surgical instruments. The background shows the sterile environment of the OR with various pieces of equipment and bright lights.

- Radiosurgery:

Multidisciplinary team made up by Neurosurgeons and Radiation Oncologists, focusing in management of meningiomas, vestibular schwannoma, other cranial nerve tumors, recurrent gliomas and arteriovenous malformations.

- Neurosurgery:

Medical team educated abroad with more than 30 years of experience, specialists in endovascular surgery (AVMs and aneurysms), tumors (brain, base of skull and column in children and adults), degenerative diseases, spinal deformities, neurotrauma and abnormal movement surgery (Epilepsy and Parkinson among others).

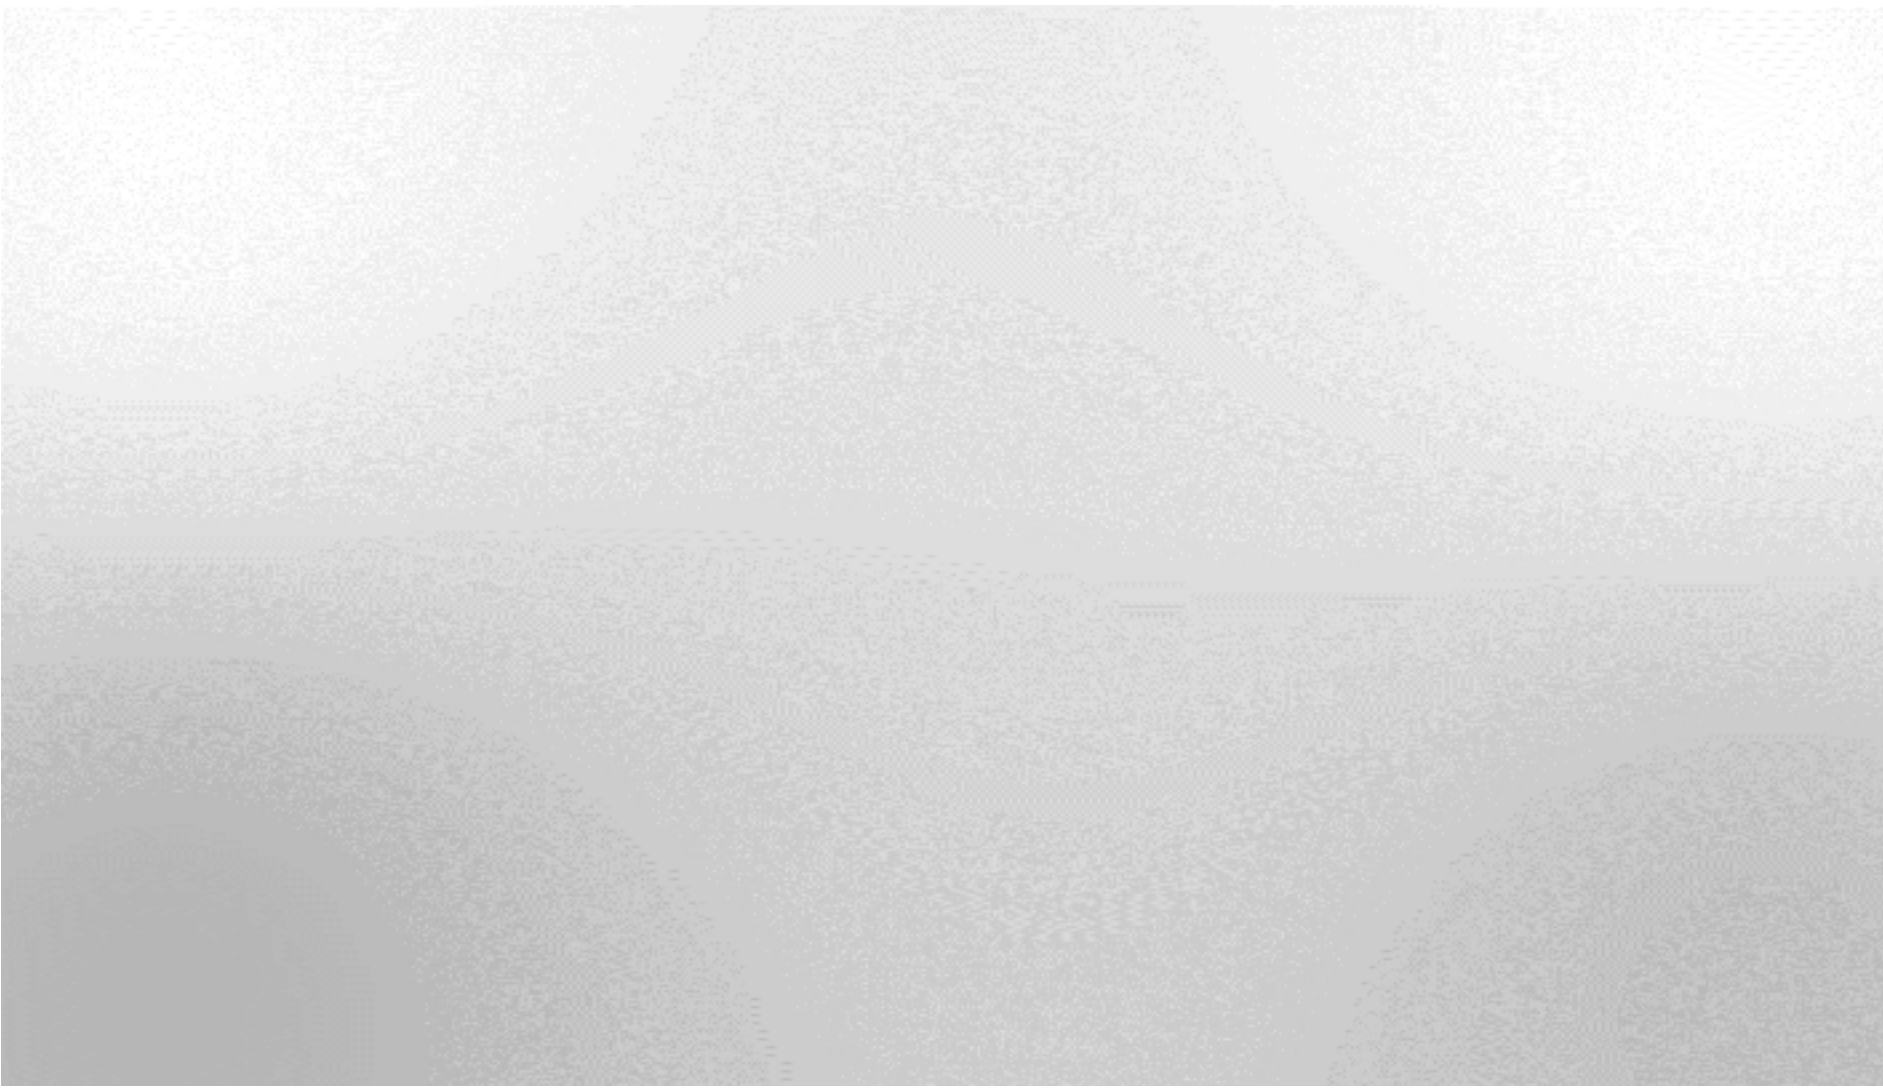

• Orthopedics:

We have the most complete group of specialists with over 22 years of experience in our Institution in the fields of joint replacements (hip, shoulder and knees), arthroscopy, bone lengthening (bone transport), complex hand and foot surgery, orthopedic oncology for children and adults and, sports medicine.

• Spine Surgery:

Multidisciplinary medical team made up by trauma Orthopedists and neurosurgeons with extensive experience in correction of severe scoliosis and spinal cord injuries, intramedullary tumors, correction of kyphosis and revisions of previous surgeries, complex infections of the spine and, endoscopic surgery, all approaches for pediatric and adult patients.

- **Bariatric Surgery:**

It is part of the Obesity service and surgical weight management, consisting of specialists in laparoscopic surgery, Psychology and Psychiatry, nutrition and Endocrinology assisting in the weight loss process. Techniques used: Bypass, Sleeve and insertion of intragastric balloon.

- **Obstetric Gynecology:**

Team of obstetric gynecologist specialized in intensive obstetric care with 24/7 mother and fetus monitoring, Humanized Childbirth without pain. Subspecialty in IVG, fetal surgery and management of complications: accretism. Neonatal ICU for premature children weighting from 635 grams and gestational age of 24 weeks.

- **Laparoscopic Gynecology:**

Procedures are performed through incisions of 1 cm or less, with less pain and faster recovery: hysterectomy, hysteroscopy, myomectomy, salpingectomy, excision of endometriosis, cystectomy. Endoscopic hysteroscopy does not require anesthesia, it takes 15 minutes; it promotes recovery and facilitates active participation in medical explanation.

- **Surgical Oncology:**

We have subspecialties in all fields, head and neck, chest, breast, gastrointestinal, colon and rectum and orthopedic oncology. With the support of multidisciplinary teams to provide assistance to the patients and their family members.

• Hospitalization:

Committed to the patients and their family members, Fundación Valle del Lili has a team dedicated to serving the community in a personalized and specialized manner with quality, warmth, competitive levels of knowledge and experience; supported by technology for the diagnosis and treatment of diseases.

- Intensive care unit:

One of the most complete private infrastructures for critical care in the country, with a team of intensive care physician and specialists available 24 hours a day.

Supported by technological and diagnostic infrastructure, providing solutions to high complexity healthcare problems with the highest quality standards. The Institution has comfortable areas designed specifically for patient's companions, allowing them to stay 24 hours a day with the patient.

A healthcare professional in green scrubs is operating a medical scanner. A patient is lying on the table, covered with a white blanket. The scanner has a control panel with a screen and buttons. A monitor on the left shows a medical image. The background is a clinical setting with white walls and a window with blinds.

Nuclear Medicine

- CT/CAT scan: GE VCT 64-slice Siemens, CT/PET 128-slice, Toshiba Aquilion One 320-slice
- Mammography: Siemens Digital Tomosynthesis
- 3 Magnetic Resonance Systems: Siemens 3 Teslas

• RADIOTHERAPY

The Siemens® ARTISTE™ integrates imaging for precise targeting of radiation beams.

For different treatment approaches, including 3D-Conformal radiation, Intensity-Modulated Radiation Therapy (IMRT), Stereotactic Radiosurgery (SRS) and Stereotactic Body Radiotherapy (SBRT).
