

Recommendations

oral chemotherapy

Take the medication always at the same time, according to medical recommendations.

If you forget to take the medication in the indicated schedule, and it hasn't passed more than six hours, take it. Otherwise, you must wait for the next dose. Don't try to compensate the dose that wasn't taken, ingesting more than one dose at the same time, because it can cause more toxicity in the body.

Take the entire pill. Do not break, crush or chew the medicine.

Take between 8 to 10 glasses of liquid in the day, if it isn't contraindicated by the doctor.

Take the medicine with water. Avoid using other type of liquid such as coffee, juice or milk.

Do not share your medication with anyone. Do not change the dose or stop taking the medication without consulting your doctor.

Do not handle the medication. Try to locate them in a disposable container or cup and ingest them immediately.

Keep medications as recommended by the manufacturing laboratory. You will find the indications inside the box. Keep them in its original packaging, in a safe place, away from other medicines for family use. Remember: these must be outside the reach of children and pets.

Maintain good oral hygiene. After each brushing, use mouthwash without alcohol.

Use moisturizing lotions to avoid dryness in the skin. Avoid sun exposure and getting in sun tanning cabins. Use always sun screen.

Av. Simón Bolívar Cra 98 # 18-49 PBX (57)(2) 331 90 90
