

## VAGINAL WET MOUNT TEST

**Dear patient,**

**In order to ensure a reliable result, please follow the instructions below:**

- Before going to the laboratory, wash external genitalia. You may use your usual soap for personal hygiene, making sure you rinse it completely with plenty of water.
- Do not use antiseptics, vaginal ovules, vaginal douches, powder, vaginal creams or other substances for topical application at least 5 days before collecting the sample.
- Do not have sex for three days before collecting the sample.
- Menstrual blood may interfere with sample analysis. Do not collect the sample 2 days before menstruation and up to 5 days after the end of your menstrual period.
- If you have any questions, please call us at phone number 331 90 90 (Ext. 3152 - 3132 - 6468 - 6469 - 4154).

**Remember that according to Law 100/1993, it is the patients' DUTY to take self-care measures and adhere to their Treating Physician recommendations.**
